## **Executive Summary Report**

### **Overview of the Methodology**

Leisure Vision conducted a Parks and Recreation Needs Assessment Survey on behalf of the City of Sequim during July and August of 2011. The purpose of the survey was to help establish priorities for the future development of parks and recreation facilities, programs and services within the community. The survey was designed to obtain statistically valid results from households throughout the Sequim School District. The survey was administered by a combination of mail and phone.

Leisure Vision worked extensively with City of Sequim officials in the development of the survey questionnaire. This work allowed the survey to be tailored to issues of strategic importance to effectively plan the future system.

Leisure Vision mailed surveys to a random sample of 3,000 households throughout the Sequim School District. Approximately three days after the surveys were mailed, each household that received a survey also received an automated voice message encouraging them to complete the survey. In addition, about two weeks after the surveys were mailed, Leisure Vision began contacting households by phone. Those who indicated they had not returned the survey were given the option of completing it by phone.

The goal was to obtain a total of at least 600 completed surveys, including 300 from households in the City of Sequim, and 300 from households outside of the City of Sequim, but inside the Sequim School District. This goal was far exceeded, with a total of 722 surveys having been completed, including 307 surveys from City of Sequim households, and 415 surveys from households outside the City of Sequim, but inside the Sequim School District. The results of the random sample of 722 households have a 95% level of confidence with a precision of at least +/-3.6%.

The following pages summarize major survey findings.
