Charlie,

We'll have the sign made up in the same style and color scheme as our street signs. It will be similar to the attached picture of the LA sister city sign. The city logo will be in the circular area at the top center of the sign, which will be double sided and say "Sister City" with "of Sequim" below in smaller letters. The finger sign, also double sided, will have a centered arrow, and text: "4,971 mi. Shiso City, Japan" and below that "8,000 km. 紫蘇" (Ryoko will provide actual translation). Pole will be one of our standard street sign poles powder coated black to match other poles on the plaza. We'll work with the sign company once I get the translation. Sign will be aligned on a bearing of 302°.
