**THANK YOU FOR YOUR SUPPORT!**

**CLALLAM COUNTY CRITICAL INCIDENT STRESS MANAGEMENT TEAM**  
**SCOPE OF WORK**  
**February 14, 2020**

The Clallam County Critical Incident Stress Management Team (CCCISM) provides certified peer support to emergency responders in order to build and maintain resilience, and assist in management of critical incident stress that is a normal component of the job. Our goal is to contribute to building a highly functioning and healthy community of emergency responders, by providing them with tools and strategies to support effective stress management and to increase retention of trained responders in emergency service agencies.

The CCCISM Team was formed in 2001 and is available to emergency response agencies throughout the county, at all levels: local, county, state, tribal, federal. Services can be accessed 24 hours a day, 7 days a week through either direct referral to a team member or calling PenComm, (360) 417-2459. All team members are volunteers and are not financially compensated for the work they do. All CCCISM Team members who provide direct service have been trained in the International Critical Incident Stress Management model. Each team member has completed at least the Group Crisis Intervention course, with many members independently seeking additional training to strengthen the skills of the entire team.

Services offered by the team include:

- Pre-incident education regarding the value of effective critical incident stress management.
- Immediate response following critical incidents, which may include one-on-one meetings with responders or a group defusing held with responders prior to leaving an incident, in order to provide an opportunity to discuss initial impacts of the event and strategies for stress management.
- Group debriefings, offered one to several days following an incident, to allow an opportunity for all responders to talk about their experience, some of the impacts and ways to mitigate the effects, in order to increase resilience and effective functioning on the job.
- Individual meetings with responders, as needed.
- Referral for professional help, as requested.

As a non-fee-for-service entity, the CCCISM requests annual voluntary contributions from county emergency response agencies. These contributions would provide funding so that team members could obtain additional training by the International Critical Incident Stress Foundation (ICISF) trainers, in order to keep the Team's skill levels up to date. Funding would also be utilized for purchase of supplies for debriefings and travel reimbursement for team members, who may respond well outside their own community.

Dear Chief Crain,

Enclosed please find an invoice for 2020 services of the Clallam County Critical Incident Stress Management Team. A suggested amount is indicated on the invoice. However, you may change the amount according to the flexibility of your budget.

Also enclosed is a "Scope of Work" letter.

Our team depends on your support. We are always ready to support the members of your agency at no direct charge to you.

*Your* support is very much appreciated!

Sincerely,

Amanda Slowey  
Treasurer
