Sustainable Plants for Sequim, WA

Plants to support water conservation and sustainable landscaping

+25 ft

Red Sunset Maple (Acer rubrum)

Grows between 40-60 feet tall and 25-35 feet wide, Varieties "Armstrong" and "Red Sunset" are recommended for right-of-ways.

+25 ft

Yoshino Cherry (Prunus x yedonensis)

Grows between 20-30 feet tall. Almond-scented, whitish-pink blossoms each spring. Provide vital food source for birds, butterflies, and pollinators.

-20 ft

Red-Flowering Currant (Ribes Sanguineum)

Deciduous, up to 10 feet tall, produces nectar-rich flowers in April and berries in September for birds and other wildlife.

-20 ft

Dwarf Japanese Maple

Grows between 6-10 feet. Proportional spread, making them suitable for limited spaces. Prefers consistent moisture.

-20 ft

Jade Crabapple ('Red Jade')

Grows between 15-20ft wide. Weeping tree with white flowers. Prefers full sun. Drought tolerant.

GRND

Kinnikinnick (Arctostaphylos uva-ursi)

A drought-tolerant, low-growing evergreen with red berries enjoyed by birds and small mammals.

GRND

Red Winter Heather (Erica x darleynensis)

A low-maintenance, evergreen shrub that produces magenta flowers in the winter and early spring. Attracts pollinators. Full to partial sun.
