Required Attachments

Existing sign list describing each existing sign on the premises, including sign type, copy, sign area, location on premises and date installed.

Vicinity Map showing the location of property.

Site Plan with dimensions showing property lines, names of adjacent street, location of buildings, location of existing and proposed signs (including signs on building), location of driveways and parking.

Building Elevations, for building signs, showing sign locations and limits of lease area. A digital photo with a superimposed sign may be submitted as well.

Sign Elevation and Section, dimensioned showing composition of sign material, construction, height, sign area, copy area, and text of copy.

Drawing of how sign is to be mounted, including footing details, methods of attachment, point of electrical connection and structural and wind load calculations if necessary. Details of structure to which sign is to be mounted upon may also be required.

Any other information deemed necessary by the Planning or Building Department.

PLEASE NOTE THE FOLLOWING:

Depending on the size of sign and proposed method and details of construction, the sign plans and calculations may need to be prepared and stamped by a **licensed structural engineer**.

Signs that have an electrical component may require an **Electrical Permit** issued by the State of Washington Department of Labor and Industries. If the signs are internally illuminated they must have a U.L.I. rating affixed to the sign.

Please be advised:

Required information not provided on the application or attached upon submittal will render the application **INCOMPLETE and it will not be reviewed by City staff.**
